Universidad Pedagógica Nacional, Mexico D.F., Mexico

Motivation in Higher Education.

by Žaneta Geryk Ph.D., The Gdansk Management College, Gdansk, Poland

LUNCH BREAK 12:30 – 14:00

Workshop on the Globalization of Education V: The Global Open University of the IIAS as a Conduit for an Internet-Based Ph.D. Program

Conducted by Prof. Winfried K. Rudloff, Governors State University, Univ. Pk., IL, USA

This workshop is intended to focus on the development of a global Ph. D. Program where faculty members of the Institute are matched with students from around the world. As the International Institute for Advanced Studies in Systems Research and Cybernetics (IIAS) is gradually embarking on an educational program that brings together educators and students from all over the world, we recognize that most institutions of higher learning are generally restricted to local and provincial requirements. However, the Institute's members from around the Globe represent a potential force that can cooperate in our efforts to bring higher education to remote and deprived areas through the technologies of electronic university.
